ELIGIBLE IMPROVEMENTS		South Coastal
<p>Primary Space Heating - Maximum of one incentive for Primary Heating Space</p> <p>Please note: Heating systems may be advertised with an AFUE "up to" a certain percentage. Please ensure that the installed efficiency of your heating system meets the requirements below.</p>		
Certified Installation	Furnace, Heat Pump, Boiler or Heat Recovery Ventilator (HRV) system installed by a TECA Quality First, HRAI Skilltech or ASC T Mechanical Technologist accredited professional.	\$100
Gas Furnace or Boiler Replacement	ENERGY STAR gas furnace 95% AFUE or better with DC variable speed motor	\$500
	ENERGY STAR condensing gas boiler 90% AFUE or better	\$500
	Zero Clearance Gas Furnace 90% AFUE	\$250
Air Source Heat Pump Installation	ENERGY STAR central system verified with an AHRI number, with either a new DC variable speed air handler or a new ENERGY STAR furnace with DC variable speed motor	\$1500
	ENERGY STAR central system added to an existing furnace or added to an existing indoor air handling unit	\$1000
	Ductless mini-split: one head in main occupied area plus one additional head on a different floor, ENERGY STAR or inverter-based system	\$1500
	Ductless mini-split: Single head in main occupied area, ENERGY STAR or inverter-based system	\$1000
	ENERGY STAR single package system	\$1000
<p>Note: All components of each ENERGY STAR qualified Air Source Heat Pump system must have a qualifying AHRI number. This includes new or existing furnaces, indoor and outdoor air handlers, and heat pumps. If you are planning on installing an Air Source Heat Pump insist that your contractor consult the "LiveSmart BC Notes for Contractors" before purchasing or installing any equipment.</p>
